

Foundation Fortnightly

Friday 17th June

Jigsaw

This half term we are looking at 'changing me.' We will be looking at the life-cycles of different animals and how they change and thinking about how we have changed as we have grown up. We will talking about lifecycles and the changes other animals go through as they grow up.

Science and Maths Week

What a brilliant week we had!! The children immersed themselves in Science and Maths activities and investigations! They particularly enjoyed the rocket investigation and used measure to see how far their balloon rocket had travelled!

Oh No! An Alien Spacecraft has landed in our outside classroom!! What are we going to do?

I liked Space day because I could be an astronaut.

Space day was fun!

Maths in Reception

This week we have been learning about 2D and 3D shapes. We have been searching for shapes in our classrooms and naming some of their properties.

Over the next 2 weeks we will be learning all about the numbers 18 and 19. Can you help me to look out for them on doors and buses?
