

TD Drums delivers high-quality drum tuition directly into primary schools, offering top class music education for children of all ages.

Lessons are conducted in groups of 3 to 6 students, carefully selected by age and ability to ensure optimal learning experiences.

Each 20-minute session is delivered using an electronic drum kit, (perfect for any budding young rockstar!) and practice pads, which are lightweight, portable tools designed to replicate the feel and response of an acoustic drum kit.

Our tried and tested teaching methods, alongside an extensive syllabus, cater for all learning types. The lessons are designed to be focused, motivational, and enjoyable, providing students with a solid foundation in drumming techniques and rhythm.

Pupils will learn essential skills, play “banging” grooves, and drum along to popular songs they know and love.

To celebrate their progress throughout the year we host an annual concert-style performance where every student is invited to participate. Families are encouraged to attend and enjoy the event, which gives each child the opportunity to showcase what they’ve learned throughout the year. We look forward to sharing their hard work and talent with you!
